Our glass covers are made with 8-millimetre-thick tempered OptiWhite glass which, due to a lower iron content, is practically a colourless float glass.The green tint of normal glass, especially visible when decorated with light colours, has been completely eliminated.

OptiWhite glass preserves natural colours, makes objects appear sharper and transmits more light.

UV coating is used during the printing and painting process making the finished product resistant to sun rays.

Using UV-hardened varnishes allows us to achieve a very durable and elegant finish.

Horizontal version:
H - Width, B - Height

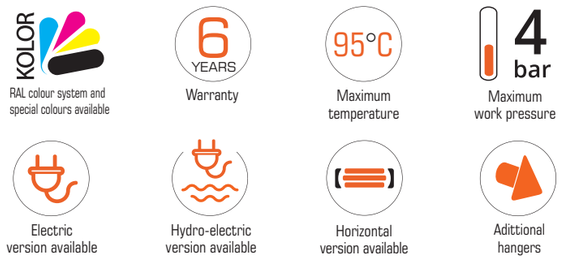
NIAGARA
GLASS COVER WITH GRAPHIC

ROOM RADIATORS

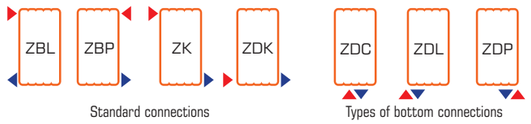
Only my

This is our latest concept how make our products tailored to our customers preferences. This model is constructed from flat panels with rounded edges, to which we apply a precision attached toughened glass graphic or photo. We provide a selection of graphic designs, but also cater for the clients taste and desires and can implement an individuals chosen design. This innovational approach to our products allows for individuality, just as you please.

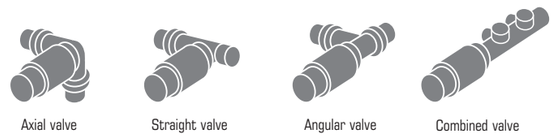
- **Horizontal pipes:** round Ø 30
- **Vertical pipes:** rectangular 8 x 70 mm
- **Cover:** tempered glass pasted to the radiator
- **Detail work:** radiator made from low-carbon steel with powder coated finish, cover-tempered glass 8 mm with graphics
- **Available graphics:** recommended standard graphics (page 48)
- **Mounting:** mounting kit included
- **Further information:** non-standard size available to order



- **Types of connections:** page 184-185



- **Recommended valves kits** details on pages 178-179



6+2 WARRANTY — 2 additional years of warranty when purchasing valves
